

Shamil J

Full Stack Web Developer | MERN & PERN Stack

+91 9791273893 · ubyshamil@gmail.com · linkedin.com/in/Shamil-J · github.com/Shamil1710

Professional Summary

Results-driven Full Stack Web Developer with hands-on experience building scalable, user-focused web applications using the **MERN** and **PERN** stacks. Proficient in designing and consuming **RESTful APIs**, implementing **JWT-based authentication**, and managing both relational (PostgreSQL) and non-relational (MongoDB) databases. Adept at delivering complete end-to-end solutions with a strong understanding of **MVC architecture**, clean code principles, and collaborative development using Git & GitHub.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), DOM Manipulation, React.js, EJS, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST API Development, JWT Authentication, MVC Architecture, bcrypt

Databases: PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Vercel, VS Code

Projects

Government Scheme Eligibility System | *React.js, Node.js, Express.js, TailwindCSS, PostgreSQL* [Live Demo](#) ↗

- Engineered a full-stack web application that enables users to discover eligible government schemes through dynamic, profile-based filtering logic — reducing manual lookup effort.
- Designed and implemented RESTful APIs using Node.js and Express.js to handle user input processing, scheme retrieval, and server-side eligibility computation.
- Architected and managed a structured PostgreSQL relational database for efficient scheme data storage, querying, and scalability.
- Built a fully responsive frontend interface using React.js and Tailwind CSS, delivering an intuitive and consistent user experience across all device sizes.
- Deployed the application on Vercel with continuous delivery, making it publicly accessible for real-world use.

Smart QR Restaurant Ordering System | *React.js, Node.js, Express.js, PostgreSQL, JWT* [GitHub](#) ↗

- Built a QR-based restaurant ordering platform enabling customers to browse menus and place orders directly from their table.
- Developed role-based dashboards for restaurant administrators to manage tables, menu items, orders, and payments.
- Designed RESTful APIs and PostgreSQL database schema for order processing, menu management, and customer sessions.
- Implemented real-time order status tracking from placement to payment completion.
- Generated unique QR codes for restaurant tables, eliminating manual order-taking workflows.
- Deployed full-stack application with secure authentication and scalable backend architecture.

Experience

Web Development Intern

December 2025 – January 2026

Cognifyz Technologies

Remote

- Developed and enhanced web application features, implementing frontend and backend improvements aligned with project specifications.
- Integrated REST APIs to enable dynamic data rendering, improving application responsiveness and overall user experience.
- Collaborated with the development team to handle dynamic data processing, debug issues, and deliver tasks within deadlines.

UI/UX Design Intern

January 2025 – February 2025

AK Infopark

On-site

- Designed and iterated on user interface layouts for web applications with a focus on usability, visual hierarchy, and brand consistency.
- Applied core UI/UX design principles to enhance end-user experience, improving navigation flow and interface accessibility.

Java Development Intern (Virtual)

Duration: One Month

Besant Technologies

Virtual

- Participated in live Java training sessions and successfully completed all assigned tasks and mini-projects related to core Java programming.
- Demonstrated strong commitment to learning through active engagement, timely delivery, and application of programming concepts.

Education

B.Tech – Information Technology

2022 – 2026

Ponjesly College of Engineering and Technology, Nagercoil

CGPA: 7.8
